Publication and evidence status

The dashboard is publicly available at https://zelusgit.github.io/ev-market-performance-insights-complete/. The five-point Tableau story is published on Tableau Public; the prepared data extract is available in a separate row. The video demonstration is pending recording and a verified Google Drive link. Browser performance measurements and narrow-screen results are also pending.

Data interpretation

The repository includes a prepared 10-field extract, not the original 37-field CSV. The extract retains 200,000 rows, has 2,028 blank annual-sales values and 3,977 blank customer ratings, and contains one repeated vehicle ID. Treat the metrics as exploratory summaries of the supplied records, not audited market totals or forecasts.

The full project report contains project scope, design, data preparation, story sequence, validation status, limitations, and next steps.
